

Group Meeting

Date: 12:30am, March 6th 2023

Place: Mangement - LT12

Attendees: Isaac Wetton, Hannah Bywood, Kate Hamilton, Kristian Dimitrov and Michal Krzyanowski

Progress of jobs:

- Isaac - finish the analysis within the next few days, then start to post the results of the magnetic fields **Done**
- Kristian - Aim to have produced multiple magnetic field simulations and written methodology of the process. **Done**
- Hannah - Write method, results and data search. Analyse data collected. **Done**
- Kate - can only work after more methods and data search sections have been written. **Done**
- Michal - Make sure to do the method, focus on the analysis of these elements already done. **Not complete**
- Rhys - Focus on the plots of the day-side and night-side and anything that has discrepancies, report section needs to be done. **Not complete due to being unwell**

Discussions:

- Hannah - Write analysis of mine and Rhys' sections. Produce a presentation.
- Michal - Methodology and data section, done for today in the evening
- Isaac - Writing improvements needed, data done!
- Kristian - Write method and other sections of the simulations
- Kate - work on Isaac's and Hannah's results and analysis

Decisions made:

1. Focus on report and writing.
2. Analyse and current plots found.
